## Policy on the Alternative Energy Source

Netaji Mahavidyalaya Arambagh is set to formulate a set of policy for its own institutional purpose in the face of steep rise in the use of electricity as a power source in recent years in favour of use of renewable sources of energy esp. Solar energy. The policy aims to make stakeholders realise the importance of using solar energy that substitutes the excess consumption of electricity.

Initiatives for effective use of renewable source of energy include

- Setting up PV solar panel of permissible capacity in the institution to cut the use of electricity and to aim sustainability in energy generation in future
- Use LED or compact fluorescent bulbs in the whole campus to save energy
- Reduce absolute use of electricity by reducing consumption of electric light, fan, air conditioner and other gadgets
- Raising awareness amongst students regarding optimum usage of electricity and minimise wastage of the same
- To use electric wiring and fixtures in up-to-date condition to prevent leakage and to replace as immediate as the issue arises

The policy would be communicated to the students and other stakeholders for proper implementation.
